DHRUV OZHA

FULL STACK DEVELOPER & FRONTEND ENGINEER

ozhadhruv@gmail.com
Kalol, Gujarat, India

LinkedIn | Github | YouTube | Portfolio | LeetCode | Twitter | Instagram

SKILLS

Languages & Frameworks
JavaScript (ES6+), TypeScript, C++, C, React.js, Node.js, Tailwind CSS, HTML5, CSS3

Databases & Backend
MongoDB, Supabase, REST APIs, Express.js

Cloud & DevOps
AWS, Google Cloud, Firebase, Vercel, Netlify, GitHub Actions, Git, GitHub, Render

Tools & Platforms
Postman, Figma, Notion, VS Code, npm

Specialized
React Three Fiber, WebGL, 3D Web Environments, UI/UX Interactive Design

HACKATHONS & AWARDS

1. 3rd Place — SU_Hackathon 2026

Software Edition | 14–15 March 2026
Sangam University, Bhilwara

Led Team *Lose Coders* to 3rd place on theme "Innovation & Technological Advancement in Textile City Bhilwara." Built **CropPilot** — a smart crop decision engine with AI-driven recommendations. Proudly represented Swaminarayan University.

Certificate | Live | Github

2. Participant — ArtPark CodeForge

Prototype Development Round | 1 April 2026
IISc Bangalore

Cleared the Prototype Development Round at IISc's ArtPark CodeForge Hackathon. Built **AI Adaptive Onboarding Engine** — an AI-powered system that adapts user onboarding flows dynamically based on behavioural context.

Certificate | Live | Github

EDUCATION

Swaminarayan University, Kalol — **2025 – 2029**
Bachelor of Engineering (BE) in Computer Science
Expected Graduation: 2029

MDS Public School, Udaipur — **2024 – 2025**
Higher Secondary Education (12th Board)
Central Board Of Education (CBSE)

INTERESTS & STRENGTHS

- Passionate about building polished, user-centric interfaces with pixel-perfect attention to detail
- Strong problem-solving mindset — enjoys tackling complex algorithmic challenges on LeetCode
- Self-motivated learner — continuously exploring emerging web technologies and AI tooling
- Effective team collaborator with experience leading hackathon sprints under tight deadlines
- Keen interest in AI/ML integration, open-source contribution & developer community building

EXPERTISE & SUMMARY

- B.E. CS fresher building production-grade full-stack and 3D web applications
- Specialized in **React.js, Node.js & modern JavaScript** with a strong eye for UI/UX design
- Mastered **React Three Fiber** for high-performance 3D spatial web environments via WebGL
- Built 4+ projects spanning agri-tech, AI onboarding, clone engineering & social discovery platforms
- Competed at **SU Hackathon 2026** (3rd Place) and **IISc ArtPark CodeForge Hackathon**
- Consistent LeetCode practitioner — sharpening DSA & problem-solving skills daily
- Completed industry simulations via Forage (AWS, Walmart, Skyscanner, Wells Fargo)

CERTIFICATIONS

1. SU_Hackathon 2026
2. ArtPark CodeForge — IISc
3. AWS Solution Architecture
4. be10X — AI Tools Bootcamp
5. Skyscanner Frontend Sim
6. Walmart Adv. Software Sim
7. Wells Fargo SWE Simulation

EXPERIENCE

Full-Stack Developer & 3D Web Engineer

2025 – Present | Freelance / Personal Projects

- Engineered full-stack web architectures using React.js, Node.js, Express.js & MongoDB
- Built immersive 3D web experiences with React Three Fiber and WebGL for interactive UIs
- Developed scalable RESTful APIs and deployed applications on Vercel, Render & Google Cloud
- Implemented responsive designs with Tailwind CSS ensuring cross-browser compatibility
- Integrated third-party services including Supabase auth, Cloudinary media, and Firebase
- Delivered production-grade solutions under strict hackathon sprint constraints at SU & IISc

PROJECTS

1. CropPilot

Live | Github

React.js · Node.js · Express.js · MongoDB · Gemini AI API

Smart Crop Decision Engine — AI-assisted platform helping farmers choose optimal crops based on soil, climate & season data. Features real-time AI recommendations and interactive dashboards. Won 3rd place at SU Hackathon 2026.

2. AI Adaptive Onboarding Engine

Live | Github

React.js · TypeScript · Tailwind CSS · AI/ML Integration

Personalised AI-powered onboarding system that dynamically adapts user flows based on behavioural context. Leverages machine learning to optimize conversion rates. Built at IISc ArtPark CodeForge Hackathon sprint.

3. PinIndia

Live | Github

React.js · Supabase · Tailwind CSS · Vercel · Render

Pinterest-inspired visual discovery platform for Indian creators. Features masonry grid layout, Supabase authentication, real-time pin management dashboard & pincode lookup with distance calculator.

4. Clone Website

Live | Github

HTML5 · CSS3 · JavaScript · GSAP Animations

Pixel-perfect, fully responsive production website clone showcasing advanced CSS layouts, component architecture, polished scroll-based animations & strict design fidelity.
