DHRUV OZHA

FULL STACK DEVELOPER & FRONTEND ENGINEER

ozhadhruv@gmail.com
Kalol, Gujarat, India

LinkedIn Github YouTube Portfolio LeetCode Twitter Instagram

SKILLS

Languages & Frameworks

JavaScript (ES6+), TypeScript, C++, C, React.js, Node.js, Tailwind CSS, HTML5, CSS3

Databases & Backend

MongoDB, Supabase, REST APIs, Express.js

Cloud & DevOps

AWS, Google Cloud, Firebase, Vercel, Netlify, GitHub Actions, Git, GitHub, Render

Tools & Platforms

Postman, Figma, Notion, VS Code, npm

Specialized

React Three Fiber, WebGL, 3D Web Environments, UI/UX Interactive Design

HACKATHONS & AWARDS

1. 3rd Place — SU_Hackathon 2026

Software Edition | 14–15 March 2026
Sangam University, Bhilwara

Led Team *Lose Coders* to 3rd place on theme "Innovation & Technological Advancement in Textile City Bhilwara." Built **CropPilot** — a smart crop decision engine with AI-driven recommendations. Proudly represented Swaminarayan University.

Certificate Live Github

2. Participant — ArtPark CodeForge

Prototype Development Round | 1 April 2026
IISc Bangalore

Cleared the Prototype Development Round at IISc's ArtPark CodeForge Hackathon. Built **AI Adaptive Onboarding Engine** — an AI-powered system that adapts user onboarding flows dynamically based on behavioural context.

Certificate Live Github

EDUCATION

Swaminarayan University, Kalol — **2025 – 2029**
Bachelor of Engineering (BE) in Computer Science
Expected Graduation: 2029

MDS Public School, Udaipur — **2024 – 2025**
Higher Secondary Education (12th Board)
Central Board Of Education (CBSE)

INTERESTS & STRENGTHS

- Passionate about building polished, user-centric interfaces with pixel-perfect attention to detail
- Strong problem-solving mindset — enjoys tackling complex algorithmic challenges on LeetCode
- Self-motivated learner — continuously exploring emerging web technologies and AI tooling
- Effective team collaborator with experience leading hackathon sprints under tight deadlines

EXPERTISE & SUMMARY

- B.E. CS fresher building production-grade full-stack and 3D web applications
- Specialized in **React.js, Node.js & modern JavaScript** with a strong eye for UI/UX design
- Mastered **React Three Fiber** for high-performance 3D spatial web environments via WebGL
- Built 4+ projects spanning agri-tech, AI onboarding, clone engineering & social discovery platforms
- Competed at **SU Hackathon 2026** (3rd Place) and **IISc ArtPark CodeForge Hackathon**
- Consistent LeetCode practitioner — sharpening DSA & problem-solving skills daily
- Completed industry simulations via Forage (AWS, Walmart, Skyscanner, Wells Fargo)

CERTIFICATIONS

1. SU_Hackathon 2026
2. ArtPark CodeForge — IISc
3. AWS Solution Architecture
4. be10X — AI Tools Bootcamp
5. Skyscanner Frontend Sim
6. Walmart Adv. Software Sim
7. Wells Fargo SWE Simulation
8. Fortune 26

EXPERIENCE

Full-Stack Developer & 3D Web Engineer

2025 – Present | Freelance / Personal Projects

- Engineered full-stack web architectures using React.js, Node.js, Express.js & MongoDB
- Built immersive 3D web experiences with React Three Fiber and WebGL for interactive UIs
- Developed scalable RESTful APIs and deployed applications on Vercel, Render & Google Cloud
- Implemented responsive designs with Tailwind CSS ensuring cross-browser compatibility
- Integrated third-party services including Supabase auth, Cloudinary media, and Firebase
- Delivered production-grade solutions under strict hackathon sprint constraints at SU & IISc

PROJECTS

1. CropPilot

Live Github

React.js · Node.js · Express.js · MongoDB · Gemini AI API

Smart Crop Decision Engine — AI-assisted platform helping farmers choose optimal crops based on soil, climate & season data. Features real-time AI recommendations and interactive dashboards. Won 3rd place at SU Hackathon 2026.

2. AI Adaptive Onboarding Engine

Live Github

React.js · TypeScript · Tailwind CSS · AI/ML Integration

Personalised AI-powered onboarding system that dynamically adapts user flows based on behavioural context. Leverages machine learning to optimize conversion rates. Built at IISc ArtPark CodeForge Hackathon sprint.

3. PinIndia

Live Github

React.js · Supabase · Tailwind CSS · Vercel · Render

Pinterest-inspired visual discovery platform for Indian creators. Features masonry grid layout, Supabase authentication, real-time pin management dashboard & pincode lookup with distance calculator.

4. Clone Website

Live Github

HTML5 · CSS3 · JavaScript · GSAP Animations

Pixel-perfect, fully responsive production website clone showcasing advanced CSS layouts,

- Keen interest in AI/ML integration, open-source contribution & developer community building

component architecture, polished scroll-based animations & strict design fidelity.
